THE AMENDMENT.

To the Editor of the Eagle: I have been watching the papers lately to Recent political events give especial timelines: to the consideration of the growth of
the machine, and the most effective way to
"smash" it. It is announced that the July
mamber of Scribner will contain the first of a
series of important papers entitled "The
series of important papers entitled "The
People's Problem," discussing the subject in
a new and vigorous way. The writer, Mr.
Albert Stickney, is a well-known lawyer of
New York City, and though his remedies
may be found radical, they have the advantage of being those of one who has given
thorough study to the subject in its historical and moral aspects.

I have been watching the papers lately to
see what I could see on the liquor question.
I am thoroughly convinced that in the opponents of the amendment we have all the necseary ingredients for the millenium. Whether
that event happens or not makes but little
difference if are only ready. I have the fion
and the lamb. Those that oppose the law
say they do it from principle(?), that they are
contending for liberty, rights and freedom.
Even the European poet, One of the Maes,
says our liberties are gone. Other usen appear and champion the cause of the church,
while the fact is these liberty-loving gentlethe fact is the subject in its historical and moral aspects.

Patrick Henry's ideas were alsays that Mr. Davis is perfectly content and ways noble and elevating, tending to make satisfied with the result of the war, and ways not men and better eitizens; while wouldn't have slavery restored if every negro in the South would beg to have the old to make and sell whisky and the liberty to get drunk with all its attending evils. Such

ideas, I believe, are degrading to the person possessing them.
I have read in ancient history of a Nation that was a very upright and honorable Nation in all its dealings, and as individuals they were honest and would not steal. But in reading over the laws I found a law

prohibitory law, it is safe to say that all the

crimes to which it points does exist. Now it appears to me that instead of talking so much about the law and abusing those that made it, the proper and common sense method to pursue would be to do as the BRICK AND STONE Democrats did when their pet institution of slavery was assalled: go to work and prove by the Constitution and the Bible, and every other available thing that it was morally right and all laws trying to suppress it mere oppression and unjust. I have not seen an article any where in which the writer attempted to show that the liquor traffic, from reginning to end is morally right or even a Cowley County Flagcent business. Now, if it is right let som me that is so prolific with their abuse of the law and its supporters, come out and detend the business, aside from the law, and put their case with others. I do not hear any one abuse the law against stealing, murder, arson or such crimes, for all admit they ar

REAL ESTATE. 1881 promises to be one of the most prosperous years ever known in the Arkansas Valley. Substantial improvements are in progress in the city of Wichita and throughout the adjacent country. Crop prospects are excellent. We are assured of another railread line being finished to Wichita during the

year, and of its being built through the western part of the county as rapidly as possible.

In view of the above facts, we would say to people content chase of real estate that now is the time to buy. We have on our books a large list of city and country property in which we can give choice bargains. In the northern part of the county, we have for sale thousands of acres, at low figures and easy terms of payment, belonging to the A., T. & S. F. Railroad Co. These lands are as choice as any in the State of Kansas, and deserve particular attention from buyers of limited means, as purchases can be effected by small payments down, and six to eleven years time on balance, with seven per cent interest.

MORTGAGE LOAN DEPARTMENT.

Having direct arrangements with eastern capitalists, we are prepared to fornish money at the very lowest rates of interest and commission, on both city and country property. Money always on hand to fill choice applications—no and country property. Money always on hand to in choice applications no delay for sending papers east, and you can get your money the same day you sign your note and mortgage. We can also make papers so that the loans can be paid off before maturity without payment of any bonus for unexpired time. The collection of interest we attend to at our office, and we have the control of loans during the the time for which they are made. We make a specialty of this loaning business, and borrowers will do well to call and see us before making applications elsewhere.

FIRE INSURANCE. The cost of insurance is uniform with all the companies represented in this city. You can secure a policy in the largest and most responsible companies for the same price you would have to pay for a policy in some small company that is liable to fail and reinsure its risks at any time. We have nine of the largest and best companies now doing business in the United States, and offer their policies with the assurance that they give "insurance that insures" absolutely and be-

ABSTRACTS OF TITLE. Complete abstract books of all city and country property receive our careful attention from day to day, and enable us to furnish correct abstracts on short notice and at reasonable rates. Our facilities for work in this line are such as

to enable us to guarantee satisfaction. Special attention given to orders from
